

TANUJ NIMKAR

Junior DevOps Engineer | AWS Certified DevOps Professional

Email: tanujnimkar.cloud@gmail.com | Phone: [+91 81800 16769](tel:+918180016769) | GitHub: github.com/TanUjNimkar | LinkedIn: linkedin.com/in/tanuj-nimkar | Nagpur, India

PROFESSIONAL SUMMARY

AWS Certified DevOps professional with hands-on internship experience building and automating cloud-native infrastructure on AWS. Skilled in designing CI/CD pipelines with Jenkins and GitHub Actions, provisioning infrastructure as code with Terraform, deploying containerized applications with Docker and Kubernetes, and implementing GitOps with ArgoCD. Experienced in Linux administration, monitoring with Prometheus and Grafana, and DevSecOps practices using SonarQube and Trivy. Passionate about building scalable, secure, and fully automated deployment pipelines.

TECHNICAL SKILLS

Cloud: AWS (EKS, EC2, S3, VPC, IAM, Route 53, RDS, CloudWatch, ACM)

Infrastructure as Code: Terraform, Ansible

Containers & Orchestration: Docker, Kubernetes, Helm, ArgoCD

CI/CD: Jenkins, GitHub Actions, Git

Monitoring: Prometheus, Grafana, CloudWatch

Security / DevSecOps: SonarQube, Trivy

Operating Systems: Linux (Ubuntu, CentOS)

Databases: MySQL

Scripting: Bash, Python

EXPERIENCE

DevOps Engineer Intern

Feb 2026 – Apr 2026

SwiftSoft InfoTech, Hyderabad

- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions, automating build, test, and deployment workflows and reducing manual release effort.
- Containerized applications using Docker and deployed workloads on AWS infrastructure, improving deployment consistency and environment parity across dev, staging, and production.
- Administered Linux (Ubuntu/CentOS) servers and standardized Git branching workflows, streamlining deployment automation for cross-functional development teams.
- Automated infrastructure configuration using Ansible and implemented proactive monitoring with Prometheus and Grafana to improve system visibility and uptime.
- Partnered with developers to troubleshoot deployment issues and root-cause failures, improving release reliability and reducing rollback incidents.

PROJECTS

Production-Grade Cloud-Native E-Commerce Platform [\[GitHub\]](#)

Tech Stack: AWS EKS, Terraform, Docker, Kubernetes, Helm, ArgoCD, Prometheus, Grafana

- Provisioned modular, reusable AWS infrastructure using Terraform, enabling repeatable environment deployment.
- Deployed and scaled containerized Kubernetes workloads on Amazon EKS for high availability.
- Implemented GitOps-based continuous delivery using ArgoCD for automated, auditable deployments.
- Configured Helm charts and NGINX Ingress for streamlined application packaging and traffic routing.
- Set up real-time monitoring dashboards and alerting using Prometheus and Grafana.

End-to-End DevOps CI/CD Pipeline [\[GitHub\]](#)

Tech Stack: Jenkins, Docker, SonarQube, Trivy, AWS EC2

- Developed a multi-stage Jenkins pipeline covering build, test, security scan, and deployment.
- Integrated SonarQube quality gates and Trivy vulnerability scanning to enforce code quality and container security.
- Automated Docker image builds and deployments to AWS EC2, eliminating manual release steps and achieving a 70% reduction in deployment time.
- Reduced overall deployment time and improved release consistency through end-to-end CI/CD automation.

DevSecOps GitOps EKS Platform [\[GitHub\]](#)

Tech Stack: AWS EKS, Terraform, ArgoCD, Jenkins, SonarQube, Trivy

- Built a unified DevSecOps platform integrating security scanning (SonarQube, Trivy) directly into a GitOps deployment workflow on EKS.
- Enforced automated security and quality gates prior to ArgoCD sync, combining Jenkins-driven CI with GitOps-driven CD in one auditable pipeline.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

Master of Computer Applications (MCA) — G.H. Rasoni College of Engineering, Nagpur / 2023 – 2025

Bachelor of Computer Applications (BCA) — Brijlal Biyani Science College, Amravati / 2020 – 2023
